

ATTENTION SHOOTERS

Find out how you can stop bad gun laws

FROM BAD POLITICIANS to negative views of shooters in the media, there's no question that shooters need to stand up to be counted.

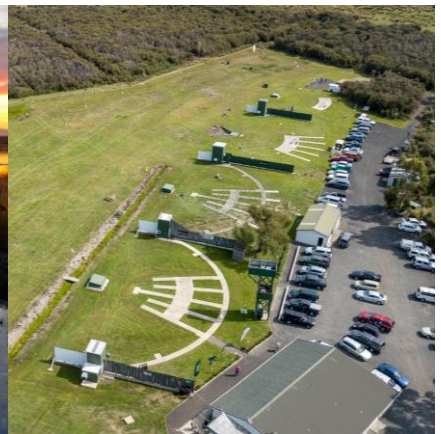

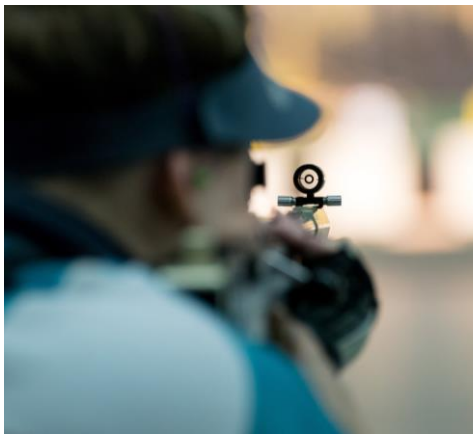

Shooting offers amazing benefits which include social enjoyment, economic support for communities to environmental outcomes.

Yet those who think otherwise have been able to get their way for far too long.

They talk down to us, want more gun laws, and even say that shooters enjoy owning *"symbols of fear"*.

NON OF THAT IS TRUE but it won't stop them from bringing in more restrictions if we ignore it.

That's why you need to stand up to be counted – before they start coming after you!

THE NATIONAL SHOOTING COUNCIL is dedicated to our political fights. We ensure your voice is heard in the halls of government and media, and that your rights and reputation as a responsible gun owner are protected.

Don't let politicians talk down on you or take away your rights.
